ABOUT US

Leading Manufacturer, Supplier and Exporter

We take great pleasure in presenting ourselves as a prominent Manufacturer, Supplier, and Exporter of Screening Machines, Vibro Finishing Machines, Vibro Screens, Circular Gyrotory Screens, and Gyrotory Screens. Our specialization lies in providing high-quality Vibro Finishing Machines to our clients, delivering products and services that align with the economic efficiency of a reliable vendor and practical production plans.

Mahakali Equipment is dedicated to fostering innovative and technologically advanced concepts aimed at evaluating current process efficiency, driving continuous enhancements, and ultimately elevating customer satisfaction levels. Located in Ahmedabad, Gujarat, known as the engineering hub of India, Mahakali Equipment offers a comprehensive range of manufacturing and services related to Vibro Screens and Finishing Machines. Equipped with cutting-edge machinery for sheet metal cutting, bending, and fabrication, Mahakali Equipment produces a diverse array of components in varying volumes.

Our experience spans across a wide range of industries, encompassing solid-solid and solid-liquid separation processes in sectors such as Food, Oil, Pharmaceutical, Mineral, Plastic, Paper, Agro, Chemical, and more. This diverse exposure has honed our ability to manufacture products of the utmost quality.

VIBRATING

Screening Machine

Round Vibrating Screening Machine, also known as a round **Vibrating Sieve** or round vibration screen, is a type of equipment used to separate and classify materials based on their particle size. It is commonly used in industries such as mining, metallurgy, chemical engineering, pharmaceuticals, and food processing.

Round Vibrating Screening Machines are designed to handle a wide range of materials, including powders, granules, liquids, and slurries. They can be customized with different screen sizes, mesh materials, and deck configurations to suit specific applications and production requirements. Some machines also come with additional features such as deblending systems to prevent screen clogging and improve screening efficiency.

TECHNICAL Information

Vibro Sifter – Vibratory Screening Machine, Vibro Sifter Machine

SIZE DIAMETER	HEIGHT	THREE PHASE MOTOR	RPM	Voltage/Hz	WEIGHT
24 inch	715 mm	0.5HP	1440	415/50	100kg
30 inch	765 mm	0.5HP	1440	415/50	150kg
36 inch	925 mm	1HP	1440	415/50	250kg
42 inch	1075 mm	2HP	1440	415/50	1000kg
48 inch	1075 mm	2HP	1440	415/50	1100kg
60 inch	1150 mm	3HP	1440	415/50	1500kg
72 inch	1150 mm	5HP	1440	415/50	1700kg

- The standard mesh, 24, 30, 36, 40, 50, 60, 80, 100, 120, 150.
- The Vibro Sifter Machine Single, Double, Triple, Four & Five Deck available.

When we promise a delivery we deliver on time, sourcing our products and materials carefully enabling competitive pricing whilst sharing the benefit with our customers. We have employed a dexterous team of professionals, which consists of highly experienced and dedicated workforce. Our organization has established a strong foothold in the market due to our consistent quality and timely services along with the enthusiasm of our technically qualified staff.
